TASK SUMMARY

Required Actions & Questions

Use `ssh -X` to connect to the remote computer

Use Zenmap to scan 192.168.0.0/24

Q1 Which computers are web servers?

Your answer:

Correct answer: 192.168.0.15, 192.168.0.22

Q2 Which server has a port open that allows unencrypted text communications?

Your answer:

Correct answer: 192.168.0.10

EXPLANATION

Complete this lab as follows:

1. Connect to the network using the rogue system.
 - a. From the Favorites bar, select **Terminal**.
 - b. At the prompt, type `ssh -X 192.168.0.251` and press **Enter**.
 - c. For the root password, type `1worm4b8` and press **Enter**.
You are now connected to Rogue1.
2. Scan the network using Zenmap.
 - a. Type `zenmap` and press **Enter** to launch Zenmap remotely.
Zenmap is running on the remote computer, but you see the screen locally.
 - b. In the Command field, type `nmap -p- 192.168.0.0/24`.
 - c. Select **Scan**.
3. Analyze the scan results and answer the questions.
 - a. From the results, find the computers with ports open that make them vulnerable to attack.
 - b. In the top right, select **Answer Questions**.
 - c. Answer the questions.
 - d. Select **Score Lab**.
